

The background of the entire page is a light yellow color. Scattered in the corners are several pixelated flowers. Each flower has a green stem and leaves, and a yellow head with a brown center. The flowers are rendered in a pixelated, blocky style.

GUIDE

Heyooo

This is a little guide to show you
how you can make your own
Minecraft Dandelion at home :3

I am trying my best to make the steps
as easy and understandable as
possible but if you still struggle or
have some questions, feel free to
text me on instagram in dms (@linebck)
I try to check them pretty often and
will try to help you as good as I can :)

I wish you the most fun while making
your own Dandelion <3

You need:

Wooden Cubes, 20mm/ 2cm
(I get mine from Amazon)
You can also get Wooden
Cubes in the size 10mm/ 1cm
if you want a smaller flower.

I made [ref links](#) from the material that I
used so if you want to [support me](#) you
can use these <3

(you can start with any color you want, I would recommend that you finish one color before you switch to the next one)

I basically mixed three different shades of orange and three different shades of green and one shade of yellow

not Minecraft related)
